

Preschool 2 Home Connection

January 2024

Under The Big Top

Everyone loves the circus. This unit is filled with colors, shapes and sizes. Circus animals and performers surface in every lesson. Bring circus, clown, or related pictures on Monday, so your child can share his or her experiences. We will look at pictures, read books, tell stories, and use our imaginations. This will delight both the children and teachers.

Creepy Crawlies

This unit investigates the characteristics and habits of insects and other small creatures. During these two weeks we will look at things that creep and crawl. We will try to determine which bugs are insects and which ones are not. We will be making an insect chart based on the "insect criteria." We will learn all bugs have six legs, no more no less, antennae, and three body parts. We will also learn the names of the three insect body parts.

We will explore the following creepy crawlers:

- * Fireflies * Earthworms * Ants * Ladybugs * Spiders
- * Caterpillars Butterflies * Crickets & Grasshoppers * Mosquitoes & Flies * Flies
